TECHNICAL SKILLS

- **Mobile:** Flutter, Dart, React Native, TypeScript, Expo
- **Application architecture:** Clean Architecture, BLoC, Zustand, Redux Toolkit, Redux Saga, TanStack Query
- **APIs and data:** Dio, Axios, REST APIs, JWT, Hive, Flutter Secure Storage, React Hook Form, Zod
- **Supporting technologies:** Java, Spring Boot, Node.js, PostgreSQL, Git, Docker, Docker Compose

PROFESSIONAL EXPERIENCE

Mebisoft | Fresher Mobile Developer | Nov 2025 - Present

Mebione (Mebieco) | Shrimp farming operations

React Native, TypeScript, Expo, Zustand, TanStack Query

Google Play | App Store

- Contributed reporting charts and create, update and delete flows for farming plans.
- Implemented device scheduling and feeding equipment management workflows.
- Integrated shrimp health AI service workflows and contributed chatbot UI and API integration.

DSS CRM | CRM and call center

Flutter, Dart, BLoC, Dio, go_router, SignalR, Firebase Cloud Messaging

Google Play | App Store

- Contributed Customer 360 views, opportunity creation and stages, and lead conversion workflows.
- Implemented call dialpad and active call UI with SIP/WebRTC integration.
- Contributed notifications with BLoC state management and account forms with permission handling.

Mebipha | Product browsing and shopping cart

React Native, TypeScript, Redux Toolkit, Redux Saga, TanStack Query

- Implemented authentication and OTP flows, product search and pagination, and product detail API integration.
- Contributed address management, category filtering and shopping cart data integration.
- Used React Hook Form, Zod and Axios for forms, validation and API workflows.

SELECTED PERSONAL PROJECT

Outfit Planner | Wardrobe and outfit planning | 2025

Flutter, Dart, BLoC, Dio, go_router, Hive, Flutter Secure Storage

- Built wardrobe management, outfit creation and calendar-based outfit planning features.
- Integrated REST APIs, JWT authentication, Google and Facebook sign-in, and onboarding forms.
- Implemented image upload, compression, caching and background removal integration.
- Applied Clean Architecture and dependency injection to organize application modules.
